Anonymous Survey Questions

Changing behaviors of teens and young adults is key to beating the Coronavirus Crisis.

Source: Coronavirus Care Community of Practice Webinar - Family Survive & Thrive Guide: Coming Home Safely – August 06, 2020

My suggestions to help making teens and young adults leaders in becoming part of the solution are:

- **Education!!**
- **Enforcement! Fines, etc.**
- **Get involved with club leadership and use that platform for change**
- **Keep them isolated in dorms and not return home to families**
- **Knowledge and awareness.**
- **More of same.. More education directly to them in the social media/ cell language they use!**
- **Peer support, tapping into teen social media influencers**
- **Stories of the impact to them.**
